## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Misaka (USPN 5859729). Misaka teaches a zoom lens device having four lens groups (column 1, lines 7-8) wherein the first lens group has a positive refractive power, the second lens group has a negative refractive power, the third lens group has a positive refractive power and the fourth lens group has a negative refractive power (column 3, lines 4-8) in the order from the object side to the image side as claimed in independent claim 1. Misaka also teaches a zoom lens satisfying the condition wherein the difference between the axial distance between the positive first lens group and the negative second lens group at the long focal length extremity and the axial distance between the positive first lens group and the negative second lens group at the short focal length extremity divided by the focal length of the entire system at the short length extremity are within the limitations as set forth in independent claim 1 and further satisfying the condition wherein the traveling distance of the positive first lens group from the short focal length extremity to the long focal length extremity divided by the traveling distance of the negative fourth lens group from the short focal length extremity to the long focal length extremity satisfies the limitation as set forth in independent claim 1 (column 11, lines 36-66).

***Allowable Subject Matter***

Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahashi (USPN 3501224), Fujibayashi (USPN 4398808), Ishiyama (USPN 4498741), Tanaka et al (USPN 5528427), Kudo (USPN 5870230), Park (USPN 5903398), Kohno et al (USPN 6002529), Hayakawa et al (USPN 6373639), Misaka (USPN 6788464) and Eguchi (USPN 6829106) all teach a four lens group zoom lens systems.
